Diagnostic Category (Check as many as apply):					

An "ENCOUNTER" of advanced airway management refers to complete sequence of events leading to a placement of an advanced airway

A "COURSE" of advanced airway management refers to ONE method or approach to secure an airway AND ONE set of medications (including premedication and induction). Each course may include one or several "attempts" by one or several providers.

An "ATTEMPT" is a single advanced airway maneuver (e.g. tracheal intubation, LMA placement), beginning with the insertion of a device, e.g. laryngoscope (or LMA device) into patient's mouth or nose, and ending when the device (laryngoscope), LMA or tube is removed.

## **COURSE INFORMATION**

Attempts for this COURSE	1	2	3	4	5	6	7	8
Who intubated (Fellow, Resident, etc)								
Discipline (ICU, ENT, Surgery, etc)								
PGY level (3 <sup>rd</sup> year resident = PL3, 1 <sup>st</sup> year fellow = PL4, NP=yrs as NP, etc.)								
ETT (or LMA) size								
ETT type: cuffed/uncuffed/ NA								
Immediately prior to this attempt was cricoid pressure/external laryngeal manipulation provided?								
During this attempt, was cricoid pressure/external laryngeal manipulation provided?								
Attempt Successful: Yes / No								

Difficult to Bag – Mask Ventilate? (Circle ONE only):	

	le one in each category):		
1. Evaluation done <b>before</b> or <b>after</b> this cou	rse is completed?		
2. Known prior history of difficult airway?			
3. Any Limited Neck Extension or (Maxima	I with or without sedation/paralytics)		
Severe Reduction (e.g. trauma patient with			
4. Widest Mouth Opening – How many <u>Pa</u>			
5. Thyromental space – Patient's fingers b	etween chin and thyroid cartilage		
	r Anatomical Barrier to visualize glottic open	ng (Subjective	
assessment before looking)?			
7. Midfacial Hypoplasia?			
8. Any other signs of difficult airway exist?			
If <b>YES</b> Please Explain:			
Known cyanotic heart disease (R to L sh	unt)?: (Circle ONE only)		
Medications:
