NEAR4KIDS QI Collection Form

ENCOUNTER INFORMATION	
Patient Information	
Airway Bundle/Pink sheet Completed – front AND	back:
Date: Time:	Location:
Patient Gender:	Patient Dosing Weight (kg):
Form Completed By (please print):	Email:
Family Member Present? Atte	nding Physician Present?
INDICA	ATIONS
INITIAL INTUBATION Check as many as apply: □ Oxygen Failure	Type of Change: From: To: Nature of Change: Clinical Condition Immediate after Previous Intubation (Exclude routine Trach Change) Check as many as apply: Tube too small Tube too big Tube changed to cuffed tube Tube changed to uncuffed tube Previous tube blocked or defective For more stable airway management For procedure (e.g. bronchoscopy, etc.)
Diagnostic Category (Check as many as apply): □ Cardiac - Surgical □ Respiratory - Upper Airway □ Cardiac - Medical □ Respiratory - Lower Airway/Pulmor □ Sepsis/Shock	□ Neurological (excluding Traumatic Brain Injury) □ Trauma (including Traumatic Brain Injury) □ Others (Specify):
□ ochaia\aiinov	

An "ENCOUNTER" of advanced airway management refers to complete sequence of events leading to a placement of an advanced airway

A "COURSE" of advanced airway management refers to ONE method or approach to secure an airway AND ONE set of medications (including premedication and induction). Each course may include one or several "attempts" by one or several providers.

An "ATTEMPT" is a single advanced airway maneuver (e.g. tracheal intubation, LMA placement), beginning with the insertion of a device, e.g. laryngoscope (or LMA device) into patient's mouth or nose, and ending when the device (laryngoscope), LMA or tube is removed.

COURSE INFORMATION

Attempts for this COURSE	1	2	3	4	5	6	7	8
Who intubated (Fellow, Resident, etc)								
Discipline (ICU, ENT, Surgery, etc)								
PGY level (3 rd year resident = PL3, 1 st year fellow = PL4, NP=yrs as NP, etc.)								
ETT (or LMA) size								
ETT type: cuffed/uncuffed/ NA								
Immediately prior to this attempt was cricoid pressure/external laryngeal manipulation provided?								
During this attempt, was cricoid pressure/external laryngeal manipulation provided?								
Attempt Successful: Yes / No								

Difficult to Bag – Mask Ventilate? (Circle ONE only):	

Evaluation done before or after this cou	urse is completed?			
2. Known prior history of difficult airway?				
3. Any Limited Neck Extension or (Maxima		s)		
Severe Reduction (e.g. trauma patient with	collar)			
4. Widest Mouth Opening – How many <u>Pa</u>	<u>tient's</u> fingers between gum/incisors	S		
5. Thyromental space – Patient's fingers b	etween chin and thyroid cartilage			
6. Evidence of Upper Airway Obstruction of assessment before looking)?	or Anatomical Barrier to visualize gl	ottic openin	g (Subjective	
7. Midfacial Hypoplasia?				
8. Any other signs of difficult airway exist?				
If YES Please Explain:				
Known cyanotic heart disease (R to L sl	nunt)?: (Circle ONE only)			
Medications:				
□ NO DRUGS USED (If no drugs used, sele	ect box and go to next section)			
Pretreatment Dosage	Paralysis Dosage		Induction Dosag	je
[] mg Atropine (check unit!)	[] mg Rocuroniu	m	[_] mg Propofol
[] mcg Glycopyrrolate	[] mg Succinylch	noline] mg Etomidate
[] mcg Fentanyl	[] mg Vecuroniu	m] mg Ketamine
mg Lidocaine	mg Pancuroni	um	Γ] mg Midazolam
mg Vecuronium	[] mg Cisatracur	onium	ſ] mg Thiopental
Others:	Others:		Others:	
outsid.	Guioro.		Othoro.	
Atropine Indication: ☐ Premed for TI ☐ T Glycopyrrolate Indication: ☐ Premed for TI Method: Begin NEW course if NEW method	ΓΙ □ Treatment of Bradycardia	form):		
Airway Management Technique and/or	Corresponding Medication Proto	col:		
Standard Sequence (administration of			aralysis Only	
Rapid Sequence requiring positive pre			wake, topical	
Rapid Sequence without PPV (Classic			lo medications	rotomy/Trochocatomy
Sedation & Paralysis (Change of tube or subsequent courses) Surgical – Cricothyrotomy/ Sedation Only Others (Specify):		otomy/ fractieostomy		
Soudion Striy			outers (Speeny).	
Apneic Oxygenation Use:				
1. Was Oxygen provided DURING any TI a	ttempts for this course?			
2. If Yes, How was the oxygen provided:				
	Г	l ita	er Flow	FiO2
NC without nasal airway		L1((51 1 1OW	1102
NC with nasal airway				
Oral airway with oxygen port				
Through LMA				
HFNC	DEED/DID			
NIV with nasal prong interface – provid	IE PEEP/PIP			
Other (device, FiO2, Setting):
